EXECUTIVE SUMMARY

- **Executive Summary: AI & Design Developments (June 13, 2026)**
- **Model Performance & Security Shifts:** Moonshot AI launched **Kimi K2.7-Code**, delivering a 21.8% performance boost on the Kimi Code Bench v2; meanwhile, Anthropic suspended **Claude Fable 5** and **Mythos 5** due to U.S. government directives regarding potential cyberattack vulnerabilities.
- **Design-to-Code Advancements:** Streamlining development, **Qt** introduced AI-powered extraction for converting Figma design tokens into QML controls, while **Vercel** enabled direct deployment of Google **Stitch** designs to live URLs, bypassing traditional Git/CLI requirements.
- **Figma Ecosystem Expansion:** The June 2026 update empowers designers with new AI-driven QA ("Check designs"), expanded usage via pay-as-you-go credits for Professional plans, and the capability to apply "Figma Make" directly to local codebases.
- **Workflow Automation Gains:** **Subotiz** debuted an AI Agent Suite and MCP server to automate complex commerce workflows, while major framework updates—**LangGraph v1.2.5** and **CrewAI v1.14.7a1**—introduced HTTPS dev server support and native Snowflake Cortex integration to enhance production reliability.

SECTION 1 — NEW AI MODELS

[Moonshot AI Releases Kimi K2.7-Code] | [June 13, 2026] | [<https://marktechpost.com/2026/06/13/moonshot-ai-releases-kimi-k2.7-code-a-coding-model-reporting-21-8-on-kimi-code-bench-v2-over-k2-6/>] | [Moonshot AI has released Kimi K2.7-Code, a specialized coding model that reports a 21.8% performance improvement on the Kimi Code Bench v2 compared to the previous K2.6 version.]

[Anthropic Suspends Access to Claude Fable 5 and Mythos 5] | [June 13, 2026] | [<https://www.washingtonpost.com/technology/2026/06/13/anthropic-ai-model-fable-export-control/>] | [Anthropic has suspended access to its recently launched Claude Fable 5 and Claude Mythos 5 models following a U.S. government directive citing national security concerns regarding potential jailbreak methods that could aid in cyberattacks.]

SECTION 2 — DESIGN-TO-CODE

[Qt Figma Design System Extraction Skills] | [June 11, 2026] | [<https://www.qt.io/blog/introducing-qt-s-figma-design-system-extraction-skills-for-developers>] | [Qt introduced new AI-powered skills to convert Figma design tokens and component libraries directly into idiomatic QML controls and singletons for Qt developers.]

[Vercel Drop for Google Stitch Designs] | [June 11, 2026] |

[<https://vercel.com/docs/knowledge-base/vercel-drop-google-stitch>] | [Vercel enabled direct deployment for Google Stitch designs via Vercel Drop, allowing users to move from design prompts to live production URLs without Git or CLI setup.]

SECTION 3 — AI IN UI/UX DESIGN

[Figma June 2026 Release Notes Update] | [June 11, 2026] |

[<https://www.figma.com/release-notes/>] | [Figma's latest updates include "Check designs" for QA, pay-as-you-go AI credits for Professional plans, enhanced context in "Make," sharper slot controls, and the ability to use Figma Make on local code.]

SECTION 4 — AI WORKFLOWS & AUTOMATION

[Subotiz Launches AI Agent Suite and MCP Server] | [June 12, 2026] |
