EXECUTIVE SUMMARY

- ### Executive Summary: AI & Design Developments (June 24, 2026)
- **OT Cybersecurity Breakthrough:** Dragos launched **EmberAI**, an operational technology-native platform that leverages historical industrial data to automate incident response and prioritize security threats based on direct operational impact.
- **Persistent Agentic Collaboration:** Anthropic introduced **"Claude Tag,"** a new Slack integration that functions as a persistent team member, capable of accumulating institutional knowledge and executing tasks asynchronously without continuous human prompting.
- **Enterprise Agent Orchestration:** Verint unveiled its **"Agent Factory,"** a specialized environment designed to blend human and AI agents, alongside new intelligence tools to automate and measure complex contact center workflows.
- **Financial & Technical Integration:** Dukascopy Bank integrated **MCP (Model Context Protocol) servers** to allow AI assistants (Claude/ChatGPT) to execute trades and manage risk directly within JForex, while Claude Code received updates for improved CLI-based workflow and background agent management.
- **Streamlined AI Content Creation:** Instruqt expanded its AI enablement suite by launching a track-building plugin for Claude Code and adding native support for **Google Vertex AI and Amazon Bedrock**, significantly accelerating the production of hands-on technical training content.

SECTION 1 — NEW AI MODELS

[Dragos launches EmberAI] | [June 24, 2026] | [<https://www.dragos.com/news/dragos-launches-emberai/>] | [Dragos released EmberAI, an operational technology (OT)-native AI built on their proprietary intelligence fabric to help security analysts prioritize threats in industrial environments.]

[Instruqt expands AI enablement capabilities] | [June 24, 2026] | [<https://instruqt.com/blog/instruqt-ai-enablement-release>] | [Instruqt introduced an AI-assisted track-building plugin for Claude Code and native support for Google Vertex AI and Amazon Bedrock to streamline hands-on AI content creation.]

SECTION 2 — DESIGN-TO-CODE

No new items found

SECTION 3 — AI IN UI/UX DESIGN

No new items found

SECTION 4 — AI WORKFLOWS & AUTOMATION

[Anthropic Announces "Claude Tag"] | [June 23, 2026] |

[<https://www.thenewstack.io/anthropic-gives-claude-a-permanent-seat-in-your-slack-channels/>] | [Anthropic launched "Claude Tag," an agentic Slack integration that operates as a persistent team member capable of accumulating institutional knowledge and acting asynchronously without direct prompting.]

[Dragos Launches EmberAI] | [June 24, 2026] | [<https://www.dragos.com>] | [Dragos released EmberAI, an OT-native AI agent platform that utilizes historical industrial cybersecurity data to enable analysts to prioritize threats by operational impact and automate incident response.]

[Verint Unveils Agent Factory and Intelligence Tools] | [June 23, 2026] |

[<https://www.cmswire.com/customer-experience/verint-launches-3-agentic-ai-tools-for-contact-centers/>] | [Verint introduced "Agent Factory," an orchestration environment for blending human and AI agents, alongside new Desktop, Workforce, and Quality Intelligence capabilities to measure and automate contact center workflows.]

[Dukascopy Bank Launches MCP-Powered Trading] | [June 24, 2026] |

[<https://www.fxnewsgroup.com/dukascopy-bank-launches-ai-powered-trading-through-chat-assistants/>] | [Dukascopy Bank released an official MCP server integration, enabling clients to connect AI assistants like ChatGPT and Claude directly to JForex accounts for trade execution and risk management.]

[Claude Code Update: MCP CLI Login & Workflow Views] | [June 23, 2026] | [<https://releasebot.com>] | [Claude Code received updates including MCP CLI login/logout functionality, improved plugin views, smarter bash command responses, and enhanced background agent handling.]
