EXECUTIVE SUMMARY

- ### Executive Summary: AI & Design Research (September 12, 2026)
- **Advanced AI Model Expansion:** Sakana AI has broadened its lineup with the launch of **Fugu Ultra v2.0 and Fugu Max**, following a period where Anthropic identified seven distinct categories of unauthorized model misuse—including biological research threats—occurring between December 2025 and August 2026.
- **Design & UI Innovation:** Figma's September 2026 update introduces **generative interactive shader effects** and enhanced community-level publishing, complemented by new Model Context Protocol (MCP) integrations that enable sophisticated, multi-tool agent workflows within design environments.
- **API & Infrastructure Connectivity:** Google Cloud API Gateway now supports **remote MCP server functionality**, allowing organizations to expose legacy REST APIs as ready-to-use tools for AI agents without requiring complex backend modifications.
- **Rise of Agentic Ecosystems:** Industry automation is shifting toward self-hosted agentic platforms, evidenced by FPT IS's **"AkaNinja" AI copilot** for regulated sectors and AdAI's new performance-driven platform that automates the creative production of digital advertisements.
- **Enhanced Agent Autonomy:** Claude Managed Agents have deployed **auto-permission evaluation policies**, allowing the server to intelligently handle tool-call approvals, which, alongside new live terminal connectivity, significantly streamlines secure, high-stakes automation workflows.

SECTION 1 — NEW AI MODELS

[Sakana AI Releases Fugu Ultra v2.0 and Fugu Max] | [2026-09-11] |

<https://llmgateway.io/timeline/> | [Sakana AI released two new models, Fugu Ultra v2.0 and Fugu Max, expanding their model lineup.]

[Anthropic Threat Intelligence Report on AI Misuse] | [2026-09-10] | <https://www.anthropic.com/news/detecting-and-countering-misuse-of-ai-september-2026> | [Anthropic released a comprehensive report detailing seven harm areas, including biological misuse, where their models were used for unauthorized research between December 2025 and August 2026.]

SECTION 2 — DESIGN-TO-CODE

No new items found

SECTION 3 — AI IN UI/UX DESIGN

****Figma September 2026 AI Release**** | 2026-09-03 | [Figma Release Notes](https://vertexaisearch.cloud.google.com/grounding-api-redirect/AUZIYQFwy_u_ab2twCHeq_HJIOMw7G6ZipuoPv3V4pFB5DIKFYD6MPetvVx1hk-TJUweM08QbStREYF16eThae2DAaSshqRsW6qfFmNhIJFxm2BdFgnretPGpTbF) | Figma expanded its generative AI capabilities to include interactive and animated shader effects, community/organization-level publishing for generative tools, and new MCP (Model Context Protocol) updates for third-party agent workflows.

SECTION 4 — AI WORKFLOWS & AUTOMATION

[Google Cloud API Gateway adds Model Context Protocol (MCP) support] | 2026-09-11 | <https://cloud.google.com/release-notes> | Google Cloud API Gateway now supports acting as a remote MCP server, enabling REST APIs to be exposed as tools to AI agents without backend modifications.

[FPT IS releases Akabot update as an Agentic Automation Ecosystem] | 2026-09-11 | https://futurumgroup.com/wp-content/uploads/2026/09/stock_0909-1024x576.png | The Akabot platform update introduces the "AkaNinja" AI copilot, a self-hosted AI Hub for regulated industries, and centralized governance controls for the automation lifecycle.

[AdAI launches agentic platform for automated digital ad creation] | 2026-09-11 | <https://www.newsfilecorp.com/release/246473> | AdAI introduced a platform that utilizes AI agents to remake existing digital advertisements using brand assets and performance data, aimed at streamlining creative production workflows.

[Claude Managed Agents receive auto-permission evaluation] | 2026-09-10 | <https://platform.claude.com/web-api/og/docs/en/release-notes/overview?design-rev=2> | Claude Managed Agents now include an "auto" permission policy where the server evaluates and manages tool call approvals, alongside new terminal connectivity features for live session management.
