EXECUTIVE SUMMARY

- ### Executive Summary: AI & Design Research (September 24, 2026)
- **OpenAI Agent Infrastructure:** OpenAI launched the **Agents API (Public Beta)**, providing a managed cloud environment for event-triggered automation, alongside the new **GPT-6 "Sol" (coding)** and **"Luna" (clerical)** models, which reduce operational costs by 50% compared to the GPT-5.6 tier.
- **Enterprise AI Governance:** ServiceNow released version **1.1.7 of the AI Service Graph Connector**, enabling organizations to perform automated discovery and inventory management for AI agents and models within LangGraph-based architectures.
- **Design-to-Code Innovation:** **Oven AI** released a technical framework for leveraging the **Figma Plugin API** and standard web technologies, lowering the barrier for developers to build custom automated design-to-code workflows.
- **The State of Code Quality:** **Qodo's 2026 Code Quality Report** highlights an industry-wide pivot toward implementing stricter governance and quality-control standards as AI-driven automation becomes the primary driver of the software development lifecycle.
