

AI & Design Daily Digest

2026-08-27 | Powered by Gemini API + GitHub Actions

EXECUTIVE SUMMARY

- **Executive Summary:** AI & Design Research (August 27, 2026)
- **Local Agent Orchestration:** Perplexity has launched a "Portable Computer" agent runtime, enabling users to run orchestrators and subagent LLMs (such as Qwen3.8-27B) locally on personal hardware with 24GB+ VRAM, prioritizing privacy and offline capability.
- **Expansion of MCP Standards:** Adoption of the Model Context Protocol (MCP) is accelerating; notable releases include Knack's HIPAA-compliant relational data backend for AI coding tools and PortSwigger's Burp Suite DAST 2026.8.2, which allows agents in Cursor and Claude to directly access vulnerability reports.
- **Enterprise AI Reliability:** Google Cloud introduced "Gemini Enterprise for Financial Services," a vertical-specific platform tailored for capital markets, specifically designed to solve persistent enterprise challenges regarding agent reliability, security, and strict data privacy.
- **Improved Design-to-Code Pipelines:** The newly released "TidyUp" Figma plugin automates layer naming based on structural content, bridging the gap between human designers and AI models by ensuring generated code is semantically accurate and interpretable.
- **Workflow Interoperability:** Microsoft has expanded its Agent Framework with standardized channels (Telegram, A2A, MCP), while SandboxAQ open-sourced "Switch," a platform that facilitates human-AI collaborative team workflows directly within existing enterprise tools like Slack and Microsoft Teams.

SECTION 1 — NEW AI MODELS

[Perplexity Releases "Portable Computer" Agent Runtime] | [2026-08-25] | [https://vertexaisearch.cloud.google.com/grounding-api-redirect/AUZIYQGV9O5Y6P6vOjBsObXqhi1dN5jixuGxah8k96DL5I2EFsnd73MDKlsBR_4bQuDUY-ZyXZiubOh0rOHTLsgSIlBXDyN5te7q-vcKUkZyGdzhGMFQV1AL1KPBZ3Ilb79AsDw1GEH6A7yGiO5n_Acme8sbPhq4SyUuMrSR-9sRpeE2Gw==] | [Perplexity launched an agent runtime that allows users to run their orchestrator and subagent LLMs (such as Qwen3.8-27B) locally on personal hardware with 24GB+ VRAM.]

[Zhipu AI Releases GLM-5.3-Flash] | [2026-08-26] | [<https://vertexaisearch.cloud.google.com/grounding-api-redirect/AUZIYQGVrpbwF--JdPYQL7vIpiDL6nKkylsV07OGIjKPgne2a90VfvueBW1E8YGcbB4XaKWwWZ6h7IBW7lwaIvxD4GjO0yxfU52XltMK-IA2fMA8XANQgTA=>] | [Zhipu AI released the GLM-5.3-Flash model, which is now available via major model integration platforms.]

[Google Cloud Launches Gemini Enterprise for Financial Services] | [2026-08-25] | [https://vertexaisearch.cloud.google.com/grounding-api-redirect/AUZIYQH_KQekjxkHgUqihAfKo0imVa6n74CdG3JQUBwIGzYHUSU_miGui8sDe9A7IVv16M195YU_fA96mz24y86azq-iQ9Pc7RC0oVNjiSvfh5ZLYAONRmC1WSPsFPobee9mxjayBWtvK2Vctb-B43cmVc6uINB93cpNnZPa2V6h3CLVFzZckkePh5vXJnnmK_gl61-npI9H] | [Google Cloud introduced a specialized vertical AI platform designed for capital markets and corporate banking, focusing on addressing

enterprise concerns regarding AI agent reliability, data privacy, and security.]

SECTION 2 — DESIGN-TO-CODE

[TidyUp Figma Plugin Released] | [August 26, 2026] |
[<https://forum.figma.com/t/tidyup-layer-names-that-explain-themselves-to-humans-and-to-ai-free-plugin/1006616>] |
[A new free Figma plugin has been published that automatically renames layers based on their structure and content to improve legibility for both humans and AI models.]

SECTION 3 — AI IN UI/UX DESIGN

No new items found

SECTION 4 — AI WORKFLOWS & AUTOMATION

[Microsoft Agent Framework Channels Launched] | [2026-08-26] |
[[https://devblogs.microsoft.com/agent-framework/...](https://devblogs.microsoft.com/agent-framework/)] | Microsoft introduced agent and workflow channels to the Agent Framework, allowing developers to expose agents via standardized interfaces like MCP, Telegram, and A2A without needing custom runtimes.

[Knack Launches MCP Server] | [2026-08-26] | [<https://www.prnewswire.com/...>] | Knack released an MCP server providing a HIPAA-compliant, relational data backend for AI coding tools like Claude, ChatGPT, and Replit, designed for regulated enterprise environments.

[PortSwigger Releases Burp Suite DAST MCP Server] | [2026-08-27] | [<https://portswigger.net/...>] | The new Burp Suite DAST 2026.8.2 update includes a native MCP server, enabling AI agents in tools like Claude Desktop or Cursor to directly interact with scan data and vulnerability reports.

[SandboxAQ Open Sources Switch] | [2026-08-26] | [<https://www.prnewswire.com/...>] | SandboxAQ released Switch as an open-source platform that integrates teams of humans and AI agents into existing enterprise collaboration tools like Slack and Microsoft Teams.
