

AI & Design Daily Digest

2026-10-05 | Powered by Gemini API + GitHub Actions

EXECUTIVE SUMMARY

- **Executive Summary: AI & Design Developments (2026-10-05)**
- **Figma AI Scaling:** Figma has officially moved its AI design-file agents and Weave tools from open beta to General Availability, transitioning these features to a credit-based consumption model for professional users.
- **Enhanced Local Compute:** ASUS has expanded its AI hardware ecosystem by releasing a new 64GB configuration of the Ascent GX10 AI supercomputer, specifically optimized for running autonomous agents locally.
- **Infrastructure for Open-Source:** The increased capacity of the ASUS Ascent GX10 is designed to facilitate the private, local execution of complex open-source models, reducing reliance on cloud-based AI inference.
- **Workflow Evolution:** Together, these updates signal a shift toward high-performance local hardware enabling the deployment of sophisticated AI agents that interact with mature, credit-based design environments like Figma.

SECTION 1 — NEW AI MODELS

No new items found

SECTION 2 — DESIGN-TO-CODE

No new items found

SECTION 3 — AI IN UI/UX DESIGN

[Figma General Availability: AI Agents and Weave Tools] | [2026-10-06] | [https://help.figma.com/hc/theming_assets/01HZFG1CK3ZD17MJD7X1K6QF2N] | [Figma is moving its design-file AI agent and Weave tools from open beta to general availability, transitioning them to a credit-based consumption model.]

SECTION 4 — AI WORKFLOWS & AUTOMATION

[ASUS Announces New 64GB Configuration of ASUS Ascent GX10] | [2026-10-05] | [https://press.asus.com/assets/w_1266,h_847/1e7a03f8-992e-4be8-a685-2650d0b2d7f3/ASUS_Ascent_GX10_PR-image.jpg] | [ASUS has

released a new 64GB configuration of its Ascent GX10 AI supercomputer, designed to enable local development and execution of autonomous AI agents using open-source models.]
