EXECUTIVE SUMMARY

- Research summary for 2026-03-29 (auto-generated fallback):
- New AI Models:
- AI in UI/UX Design:
- AI Workflows & Automation:

SECTION 1 — NEW AI MODELS

9. **OpenAI ChatGPT Product-Layer Updates (March 26–28)**

March 26–28, 2026 | [labla.org](https://www.labla.org/latest-ai-model-releases-past-24-hours/ai-model-releases-industry-updates-march-27-

SECTION 2 — DESIGN-TO-CODE

Research unavailable today

SECTION 3 — AI IN UI/UX DESIGN

Note on Framer: The most recent Framer updates (Shaders on March 24–26) are UI/visual design tooling additions, not AI-specific. No new Framer AI-specific feature was released in the last 48h beyond the Shaders system. The previously released **Workshop** (AI component generator) and **Wireframer** remain their core AI features.

SECTION 4 — AI WORKFLOWS & AUTOMATION

This was subsequently resolved with the v1.1.9493 patch noted above.

Summary of what's concrete and new in the last 48h:

The only strictly $\leq 48h$ item is the **Claude Desktop Dispatch bug fix patch (v1.1.9493)** on March 29. The major substantive releases — Claude Computer Use + Dispatch, Claude Code Auto Mode, and the Oracle Fusion

Agentic Applications suite — all landed March 23–24 (5–6 days ago).
