EXECUTIVE SUMMARY

- ### Executive Summary: AI & Design Research (2026-09-26)
- Aggressive Pricing in Audio AI:** Alibaba has released the **Qwen-Audio 3.1 stack**, disrupting the market by slashing audio API pricing by up to **95%**, significantly lowering the barrier for enterprise-grade voice processing.
- ChatGPT Voice Multimodality:** OpenAI has upgraded ChatGPT Voice to include native plugin support for **Slack, Calendar, and Email**, alongside a new model-selection feature that allows users to toggle between **GPT-6 Astra, Sol, and Luna** backends.
- Rapid Adoption of MCP Standards:** The Model Context Protocol (MCP) continues to see industry-wide integration, with **Eventtia** launching a no-code server for event management automation and **Stravito** releasing an MCP server to ingest consumer intelligence directly into assistants like Claude and Copilot.
- Enterprise Security Governance:** **42Crunch** has introduced a dedicated control plane for **MCP security governance**, providing businesses with necessary tools for continuous discovery, exposure management, and regulatory compliance reporting as they scale AI-agent workflows.
