

AI & Design Daily Digest

2026-08-08 | Powered by Gemini API + GitHub Actions

EXECUTIVE SUMMARY

- **Executive Summary: AI & Design Developments (August 8, 2026)**
- **Advanced Generative Media:** xAI has launched **Grok Imagine Image 2.0**, featuring region-level editing and multi-image referencing, while Wizstar's new **Seedance 2.5** and **MiniMax H3** models significantly bolster enterprise-grade AI video production capabilities.
- **Streamlined Agent Development:** NVIDIA has open-sourced **NOOA (NVIDIA Object-Oriented Agents)**, a framework that simplifies AI agent creation by condensing complex prompt templates and tool schemas into a single, reusable Python class.
- **Standardized Agent Tooling:** Vercel introduced **Skill Packs** on skills.sh, enabling developers to bundle and standardize AI agent capabilities, ensuring consistency across complex design-to-code workflows.
- **Enhanced UI/UX Toolkits:** Updates to **shadcn/ui's Figma kit** now include a multi-step Questionnaire component across eight visual styles, while **Framer's latest AI agent update** improves professional design outputs by automating accessibility (A11Y) attributes, CMS video integration, and complex page effects.

SECTION 1 — NEW AI MODELS

[xAI Ships Grok Imagine Image 2.0] | [August 8, 2026] |

[<https://unite.ai/xai-ships-grok-imagine-image-2-0-with-precise-editing-and-a-top-arena-ranking/>] | [xAI released Grok Imagine Image 2.0, featuring new region-level editing tools, multi-image reference inputs, and a smart-resize capability.]

[Wizstar Launches Seedance 2.5 and MiniMax H3] | [August 7, 2026] | [<https://www.prnewswire.com/news-releases/wizstar-launches-seedance-25-and-minimax-h3-further-expanding-its-ai-video-capabilities-302216503.html>] | [Wizstar announced the release of the Seedance 2.5 and MiniMax H3 models to enhance their enterprise AI video production capabilities.]

SECTION 2 — DESIGN-TO-CODE

[Vercel Releases Vercel Skill Packs] | [August 07, 2026] |

[<https://vercel.com/blog/skill-packs-are-now-available-on-skills-sh>] | [Vercel introduced "Skill packs" on skills.sh, allowing developers to bundle multiple agent skills into a single shareable pack to standardize AI agent capabilities across projects.]

[shadcn/ui Figma Kit Adds Questionnaire Component] | [August 07, 2026] |

[<https://shadcn.design.com/blog/new-shadcn-ui-figma-component-questionnaire>] | [The shadcn/ui Figma kit has

been updated with a new multi-step Questionnaire component, supporting all eight visual styles for designing surveys and onboarding flows.]

SECTION 3 — AI IN UI/UX DESIGN

Framer July Agent Update (Released August 4) | 2026-08-04 | <https://framer.link/agents> | Framer's latest agent update adds enhanced support for page effects, accessibility (A11Y) attributes, rich overlays, CMS video, text shadows, and improved handling of long-context interactions.

SECTION 4 — AI WORKFLOWS & AUTOMATION

[NVIDIA Releases NOOA (NVIDIA Object-Oriented Agents) Framework] | [August 07, 2026] | [<https://marktechpost.com/2026/08/07/nvidia-ai-releases-nooa-an-object-oriented-python-framework-that-turns-an-ai-agent-into-a-single-python-class>] | [NVIDIA open-sourced a model-agnostic Python framework that simplifies AI agent development by collapsing prompt templates, tool schemas, and workflow graphs into a single Python class.]
