# AI & Design Daily Digest

2026-10-20 | Powered by Gemini API + GitHub Actions

## EXECUTIVE SUMMARY

- ### Executive Summary: AI & Design Research (October 20, 2026)
- **Design-to-Code Parity:** Figma has significantly accelerated the design-to-development workflow with the public beta launch of "Code Layers," enabling direct translation of interactive prototypes into functional code, while the new Markdown-based "Specs" editor ensures AI agents adhere to strict brand guidelines.
- **Enhanced AI Agent Personalization:** Framer introduced its "Skills" feature, allowing teams to curate and reuse specific instructions for design systems and CMS workflows, drastically improving the precision and consistency of Framer’s AI agent outputs.
- **Agent-Centric Security Protocols:** To mitigate risks associated with autonomous systems, Sumsub launched a "Know Your Agent" (KYA) module for MCP to sanitize sensitive data, while Microsoft debuted "Guardian Agents" to provide continuous, machine-speed supervision of AI entities within enterprise networks.
- **Enterprise and Government AI Orchestration:** Beyond Now launched a model-agnostic "Wave AI" framework to synchronize collaboration across diverse agent ecosystems, as Accenture and Google Public Sector partner to deploy Gemini-based agents into federal systems using a specialized "Forward Deployed Engineer" model.

## SECTION 1 — NEW AI MODELS

*No new items found*

## SECTION 2 — DESIGN-TO-CODE

*No new items found*

## SECTION 3 — AI IN UI/UX DESIGN

**Figma Specs Editor Launched** | October 15, 2026 | [Dataconomy](https://dataconomy.com/wp-content/uploads/2026/10/figma-unveils-specs-editor-to-help-ai-agents-follo.png) | Figma introduced a Markdown-based "Specs" editor that allows teams to document design language and rules, enabling AI agents to reference these guidelines for more consistent, brand-aligned design outputs.

**Figma Code Layers Public Beta** | October 15, 2026 | [The AI Insider](https://theaiinsider.tech/wp-content/uploads/2026/10/Screenshot-2026-10-16-at-10.33.31.png) | Figma’s "Code Layers" feature entered public beta, allowing users to build interactive prototypes using real code and

enabling AI agents to convert designs directly into functional code.

****Framer "Skills" Feature**** | October 01, 2026 | [Framer Updates](https://vertexaisearch.cloud.google.com/grounding-api-redirect/AUZIYQGkAefLf-DKP0pl6cHosKw4o8SDn5fioIZ06GYpf5dwavTNqgCP-EOTYdm7W_P_Isw4k-najq8Rp48RcuXUdt1UrHNp2a8ojXDnzoyx7fMU4x4P70A=) | Framer launched "Skills," a new capability that allows users to save and reuse specific instructions for design systems, writing styles, or CMS workflows to better guide the Framer AI agent.

## SECTION 4 — AI WORKFLOWS & AUTOMATION

**[Beyond Now Wave AI Framework]** | [October 20, 2026] | [https://www.morningstar.com/news/pr-newswire/20261020io25740/beyond-now-launches-wave-ai-framework-to-activate-ai-agent-collaboration-across-csps-revenue-lifecycle] | [Beyond Now launched a model-agnostic AI framework designed to enable collaboration between customer-built, third-party, and native AI agents across the communication service provider (CSP) revenue lifecycle.]

**[Sumsub KYA Module for MCP]** | [October 19, 2026] | [https://ffnews.com/newsarticle/sumsub-launches-kya-module-to-prevent-unauthorized-ai-agent-actions/] | [Sumsub introduced a "Know Your Agent" (KYA) module for MCP that acts as a filtering layer to sanitize sensitive data and restrict unauthorized agent actions within internal corporate systems.]

**[Microsoft Guardian Agents and Project Perception Updates]** | [October 19, 2026] | [https://www.microsoft.com/en-us/security/blog/2026/10/19/agents-are-your-newest-insiders-security-must-move-at-their-speed/] | [Microsoft expanded its security architecture to treat AI agents as "insider" entities, introducing Guardian Agents for continuous, machine-speed supervision and dynamic risk-based access controls.]

**[Accenture-Google Gemini Launchpads]** | [October 20, 2026] | [https://shattered.io/accenture-google-gemini-agents-target-1000-fdes-2026/] | [Accenture Federal Services and Google Public Sector announced a program to deploy Gemini-based AI agents into federal government systems using a "Forward Deployed Engineer" model.]
